

# Classroom Video on Demand Integrations

LAST UPDATED

8/15/2019

Configuration and technical support of the methods listed below all come at no additional cost to our customers. For more information about any of these integration options, please contact our Support team at [video.support@infobaselearning.com](mailto:video.support@infobaselearning.com).

Type	Partner	Details
Sign in Options	<b>Google</b> 	Seamless sign in with your school Gmail account.
	<b>Microsoft</b> 	Seamless sign in with your Office365 account.
	<b>Clever</b> 	Classroom Video on Demand Clever App discoverable inside Clever (no rostering).
	<b>Classlink</b> 	Classroom Video on Demand Classlink App available.
Learning Management Systems & Tools	<b>Google Classroom</b> 	Share content to Google Classroom and allow students seamless access back into Classroom Video on Demand from within Classroom.
	<b>canvas</b> 	Classroom Video on Demand app available to install within Canvas (LTI based).
	<b>brightspace by D2L</b> 	Classroom Video on Demand insert stuff plugin available to install (LTI based).
	<b>edmodo</b> 	Embed content directly inside edmodo using record urls or embed codes.
	<b>moodle</b> 	Classroom Video on Demand filter and repository plugin available within Moodle (LTI based).

	<b>itsLearning</b> 	Classroom Video on Demand app available within itsLearning to install (LTI based).
Discovery Tools	<b>Follett Destiny + One Search</b> 	Direct integration with Follett using the Infobase search API.
	<b>Medianet</b> 	Direct integration with Medianet via meta-data imports.
	<b>TekData Snap</b> 	Direct integration with Snap via meta-data imports.
	<b>MARC Records (General)</b>	Export MARC records for importing into any other system via the Infobase admin portal.
	<b>IP Authentication</b>	IP address authentication makes it so anyone coming from your institution's IP address or range would not need to log in to access your Infobase subscriptions.

Access Methods

<b>Referring URL</b>	If your users are already logging in to a password protected page before accessing your Infobase subscriptions, we can use referring URL authentication to make sure they don't have to log in twice.
<b>Barcode</b>	Barcode authentication is primarily a "remote user" or "off campus" authentication solution. Many Libraries issue their patrons a barcode/membership number. To enable this method of authentication you will need to supply the barcode number pattern. Often it looks like the following: 25501xxxxxxxxx.
<b>Single Sign-On (SSO)</b>	By passing several key parameters in conjunction with your Account Specific Access URL, users can be logged in automatically to their personal user accounts or have a new user account created for them with SSO.
<b>LDAP</b>	NA
<b>Search API</b>	Utilize our search API to allow users to query the product on-demand and gain immediate access to content.
<b>Record URLs</b>	Record URLs are available on every page and allow direct access to content.
<b>Embed Codes</b>	Three different sizes of embed code are available on every page and allow direct access to content.
<b>Usage Booster Widgets</b>	Colorful widgets are available within the admin portal to help promote this research and allow searching.
